Word that best describes:

FAMILY.

A tiny but towering example of ultra space efficiency. We can fit four full size humans with the optional upper platform and queen sized beds. A great little functional loft area, accessible by heavy duty solid wood ladder with wood guard rails, for safety. The lower horizontal queen bed folds clean out of the way to make room for family dance parties or a serious game of Euchre. There is still just enough room for a fireplace and additional cubbie storage for extended weekend guests.
